Paper No(s)/Mail Date. _____.

5) Notice of Informal Patent Application (PTO-152)
6) Other: _____.

Art Unit 1771

- 1. The Examiner notes that in claim 32, line 1, "shelf-adhesive" should be --self-adhesive--.
- 2. The following is a quotation of the second paragraph of 35 U.S.C. § 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- Claims 1-17 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. More particularly, the Examiner notes that all of applicant's claims 1-17 should be "comprising" in nature rather than remaining in their present form where no open ended (or other terminology such as close ended) language is utilized. Additionally, claims 1-17 contain a great number of informalisms, lack of antecedent basis and the like problems which are not present in, e.g. newly presented claims 18-35. claim 1 and elsewhere it is not at all clear which side is being coated; e.g. in claim 1 "layer formed on its one side" and "paper has been finished by being in contact" each fail to indicate which face is being treated. In claim 2 it is unclear why the adhesive coated label stock is "uncoated paper". Claim 5 lacks suitable Markush language and claim 6 lacks any sort of

Serial No. 10/662,829

Art Unit 1771

meaningful structure between the various elements, i.e. "print carrier", "face paper" and "self-adhesive label stock" all seem to have no definite structural relationship to one another. Claim 8 recites again that the "face paper" is an uncoated paper, which is not understood in view of the fact that it is coated with adhesive. Claims 9, 16 and 17 are not set forth utilizing proper method format by reciting various steps that comprise the method. In claim 12 "text" and in claim 13 "figures" are vague and indefinite with respect to the type of printing they are attempting to describe.

- 4. Claims 1-35 are not rejected on the basis of adverse prior art: Claims 18-31 are allowed. Claims 32-35 are objected to as having the aforementioned informality in claim 32.
- 5. The Examiner has made of record all the prior art cited both by the Examiner and by applicant in the parent application Serial No. 09/904,441.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel Zirker whose telephone number is (571) 272-1486. The examiner can normally be reached on Monday-Thursday from 8:30 A.M. to 6:00 P.M. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris, can be

Art Unit 1771

reached on (571) 272-1478. The fax phone number for this Group is (703) 872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either private PAIR or public PAIR. Status information for unpublished applications is available through private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
